

Carriers... Are you paying too much money for a dispatch system? Are you dealing with multiple check calls, or spending all day searching load boards? Are you losing money on empty miles?

Then, it's time for...<redacted>! The ONLY, FREE GPS-based dispatch system designed to manage your day-to-day dispatch operations.

<redacted> developed <redacted>, a FREE mobile app and dispatch system, just for YOU. This real-time dispatch workflow system reduces costs by matching you directly with freight providers and speeding up the receivables process. <redacted> keeps your orders, invoices and customers at your fingertips. Plus, it easily tracks your most value assets – your drivers, your trucks and your trailers.

Drivers simply download the FREE <redacted> mobile app to their smartphone, immediately providing real-time GPS tracking, instant status updates, and document uploading. Then you gain real-time visibility of your drivers on a live map, allowing you to communicate, get status updates, document uploads, and more.

And, with <redacted>, you'll have access to <redacted>'s live freight Marketplace, where you can post your capacity to our vast network of freight providers. We take your available trucks, and automatically match them with high-quality freight in real time. This allows you to instantly receive offers, negotiate deals, and tender shipments on the exact type of freight you want. No more out-of-date postings, no mystery loads, and <redacted> freight is live and listed with a price.

Simply put...<redacted> provides you with freight uniquely matched for you so you can focus on managing your business.

<redacted>...More Freight...More Often.
